

Powder Machine 4050

SCHULZE

The **Powder Machine 4050** is specially designed for the DTF process and is predestined for the optimum application of thermal transfer powder, also known as DTF powder. Due to the stepless adjustment of the foil holders, foils up to a size of 40 x 50 cm can be inserted. The powder is optimally applied by constantly shaking the foil. Excess powder is immediately removed from the film and the optimum amount always remains on the ink to minimize squeeze marks during pressing and to achieve the optimum feel of the DTF print.

Technical data

Max. Format	40 x 50 cm
Power	35 W
Operating voltage	230 VAC
Volume	less than 70 dB (A)
Time setting	0 - 3 seconds
Dimensions	79 x 42 x 64 cm
Weight	27,5 kg
Article number	801416
